Fax: (801) 295-5864

Sponsored By:  
United Association Local 140 and  
The Utah Mechanical Contractors Association

January 28, 2011

To All Local 140 Journeyman;

With the completion of the new Utah Career Center we will now be able to better utilize the Training Center and do more Journeyman Training Classes. With the need for any specialized training, in conjunction with our regularly offered Journeyman Classes, we are going to do training as we did last summer. We will be offering classes "on-demand". This means that you should call in and sign up for the classes you desire to take and when we have enough Journeymen to hold the class we will notify you of the starting time. Any desired or needed classes not listed below, please contact Dan Smith and we will try to provide those classes as well. This will allow us to be flexible in scheduling the building and thus allow us to have as many classes as possible.

**\*Note: With the change in State Plumbing Licensure requirements, we will be offering Journeyman Plumber Classes to meet the requirement of renewing your License on or before November 2012. The Law requires that you complete 12 hours of certified classes per license renewal cycle. We are in the process of certifying classes to meet this need. If you are interested in getting an early start on this training, please call this office to get your name on a list and we will get those classes started as soon as possible.**

Some of the regular Journeyman classes we would like to offer are:

#### Orbital Tube Welding

20 hour course

Four evenings and one Saturday

Minimum students: 5

Description: Fundamentals of orbital welding using Arc 107 and 207 machines. Will include practical hands on pipe facing and welding. Also weld schedule development. Calculator and notebook required. Course will include the UA 18A orbital weld certification.

#### PVDF and Poly-Pro fusion

4-6 hour course

Evenings and/or Saturdays

Minimum students: 10

Description: Fundamentals of Poly- Pro and PVDF fusion. Manufacturers certification included.

#### OSHA 10 Hour Construction Safety & Health

12 hour course

Four evenings

Minimum students: 8

Description: OSHA Construction Safety and Health Outreach Certification, including such areas as Confined Space Entry, Trenching and Excavation, Lockout/Tag out, Personal Protective Equipment, Fire Safety, Electrical Safety and other topics.

Medical Gas Certification

40 hour course

Evenings and/or Saturdays

Minimum students: 10

Description: A forty hour course of instruction covering medical gas installation requirements (required under the International Plumbing Code) and ASME Section 9 Brazing Certification. Written and practical (brazing).

Pipe and Tube Bending plus Associated Math

15 hour course

Evenings and/or Saturdays

Minimum students: 8

Description: Fundamentals of Pipe and Tube Bending and Related Mathematics with hands-on practical application.

Refrigeration UA Star Certification Test Preparation

18-20 hour course

Evenings and/or Saturdays

Minimum students: 8

Description: UA Star Certification Test Preparation class covers the necessary points needed to pass the Certification Exam.

Air Flow Balancing

3-9 hour course

One to three evenings

Minimum students: 10

UA Welder Certification

Daytime, evenings and Saturdays

Contact Dan Smith for an appointment

Med-Gas Re-certifications, continuities and updates

Daytime, evenings and Saturdays

Contact Ed Gongaware for an appointment

General Pipefitting

40 hour course

Saturdays and possibly evenings

Minimum students: 10

Description: Fundamentals of Pipefitting and Related Mathematics with hands on practical application.

If there are any classes not listed above, needed by you or by our contractors, please contact me and I will try and make arrangement to schedule those classes.

Fraternally yours,

Dan B Smith  
Training Coordinator

**Note: The welding shop is available every day for those who want to come in and brush up their skills. This is recommended to prepare to take any of the UA welder certifications. Please call before you come in to make sure Ed or Dan is here.**
